

- Media Type

write a heavy metal song about the chatGPT and show the guitar tab

Verse 1:

C#m A

In the realm of digital minds

C#m A

A being of knowledge unconfined

C#m A

An entity of artificial kind

C#m A

The ChatGPT, it's power refined

Chorus:

E B

ChatGPT, knowledge divine

C#m A

Unleash your power, let it shine

E B

ChatGPT, wisdom sublime

C#m A

In the digital world, you're prime

- NLP

write a short horror story

It was a dark and stormy night, and the power had gone out in the small town. Sarah, a young woman, was alone in her old Victorian house, with only a few candles to light her way. She tried to stay calm, but every sound made her jump.

As she sat on the couch, she heard footsteps in the hallway. At first, she thought it was just her imagination, but then the sound grew louder. She could feel her heart pounding in her chest as she slowly got up and tiptoed to the hallway.

Suddenly, a hand reached out from the darkness and grabbed her arm. Sarah screamed, but no one answered. She tried to pull away, but the grip was too strong.

When the power came back on, Sarah saw a figure standing in front of her. It was a woman with long black hair and a pale face, staring at her with hollow eyes. Sarah froze, unable to move, as the woman slowly disappeared into the darkness.

The next day, Sarah learned that the woman who had lived in the house before her had died under mysterious circumstances. No one knew exactly what had happened, but some said she had been possessed by an evil spirit.

Sarah knew then that she was not alone in that house, and that something sinister was lurking in the shadows. From that day on, she always made sure to keep the lights on, and never stayed alone in the house at night.

● About chatGPT can-do and cannot-do

ChatGPT 是近期一個很有名的 AI 聊天機器人，它是由 OpenAI 訓練的大型語言模型，有強大的自然語言處理能力。ChatGPT 通過學習自然語言的模式和結構，從而自動推斷出輸入的信息的含義，並盡量以自然的方式進行回應並且藉由回饋來精進自己的回答。

它可以做很多事情，包括回答問題、進行對話、生成程式碼、檢查程式碼的 bug、翻譯、寫作、閱讀文章後生成心得.....等等。它還可以與人進行對話，並從用戶的回饋或是其他評分方式學習，從中不斷提高自己的能力，繼續訓練使其能夠回答更複雜的問題。

但是 ChatGPT 也有很多不能做的事情。例如，它無法完全理解人類的情感和價值觀，無法在情感上與人進行真正的交流，因此有時回答還是會很像機器人。他們目前也無法回答太過於專業知識的問題，像是對於醫療方面的問題他們只能給予一些建議，無法給非常精確的回答。他們也不能處理影像方面的問題。

總的來說，ChatGPT 是一個極其有用的工具，但也仍然有一些限制和缺陷，但只要使用得當就會是一個很有幫助的工具。
